It is a great honor and privilege for me to address you for the first time in this forum as President of Jet Aviation Group.

We have spent over half a century building up our comprehensive business aviation service capabilities, expertise and global network of facilities to meet your needs, wherever you are or want to go.

This new edition of our global guide reflects the ongoing growth of our company. Jet Aviation acquired Hawker Pacific in 2018, a leading provider of integrated aviation solutions across Asia Pacific and the Middle East. In Europe, we added two new FBO locations in Amsterdam and Rotterdam and are currently investing in upgrades at a number of our US locations. The expansion of our global footprint and portfolio brings more options and value to our customers in these regions. Similarly, we continue to invest in infrastructure and new technologies that support the highest quality and safety standards for our customers.

In November 2018, we were very proud to open a new wide-body hangar in Basel that can accommodate up to two wide-body aircraft simultaneously. It is a tribute to our past — our long history of handling major VIP modifications and completions — built to meet growing and future demand.

We look forward to remaining your business aviation service provider of choice.

David Paddock
President

Jet Aviation Basel was founded in 1967 and is a world-renowned maintenance center. With more than 50 years of experience, we provide the full range of maintenance services for most current models and the majority of out-of-production models of Airbus, Boeing, Bombardier, Dassault, Embraer and Gulfstream aircraft.

Whether your aircraft is due for a light check or heavy base maintenance, requires major alteration of the airframe or could use an upgrade in its cockpit or cabin (SatCom, IFE or cabin management systems), our technicians are committed to consistent service delivery that not only meets but exceeds your highest expectations.

We also have a long history of refurbishment, modifications and upgrades of aircraft cabins, which we perform while your aircraft is in Basel for maintenance. Our ability to meet all of your needs in-house helps improve your aircraft’s utilization by reducing its downtime. Should you require minor changes such as soft material modifications on existing interiors, new equipment, lighting changes or want to create an entirely new interior for your aircraft, our design, engineering and certification teams support and implement your plans.

Since 1977, Jet Aviation Completions in Basel has been crafting beautifully tailored private aircraft interiors. With over 200 completions to its name, it is one of the most experienced centers in the world.

At the heart of this success are three key philosophies: the backing of 40 years of expertise; a combination of artisan craftsmanship with the latest technology; and transparent communication to simplify a complex process.

Today, Jet Aviation Completions in Basel is an approved Boeing and Airbus completions center, with in-house capabilities for completions on narrow- and wide-body aircraft including the Boeing 787, Airbus A380 and Airbus 350 XWB. The facility offers design, engineering, production, manufacturing, installation, testing and certification.

With seven hangars across our Basel site, we have the capacity to work simultaneously on several large completions projects, including those with specific complexities or security needs, and all key departments and trades are represented on site. This provides the flexibility and expertise required to complete a truly customized design, from start to finish, under one roof, and ensures that even the smallest detail is finished to the highest Jet Aviation standards.

The process begins with the Design Studio. This is the bridge between ideas and engineering, where a beautiful VIP concept begins to take shape and transforms into an airworthy interior. Our experienced teams of engineers, support staff and technicians then transform this vision into a final aviation certified product, in a process that pairs traditional handcrafted techniques with the latest innovative technologies.

Tel +41 58 158 4371

Hours of operation
- Overall: Monday – Friday: 06:30 – 20:00 hours

Facilities
- Hangars: 1
- Hangar area: 10,000 sq m (107,639 sq ft)
- Workshops: 9,150 sq m (98,490 sq ft)

Airframes
- Airbus ACJ318 / ACJ319 / ACJ320 / ACJ321 (Ceo & Neo)
- Airbus ACJ330 / ACJ330 (Neo)
- Boeing B737 / B737NG / BBJ 1 / BBJ 2 / BBJ 3 / BBJ 737 Max 7, 8, 9

Capabilities
- On-site, award-winning design studio
- On-site engineering department EASA Part 21 J (mechanical, electric and certification) EASA DOA certificate
- Full bespoke interior monument production (Part 21G), system integration and testing
- Installation and Maintenance team (Part 145) to install and test interiors and ancillary systems and to maintain and return airframe and engines to service

Exterior paint
- Dedicated hangar for aircraft up to Boeing B737-800 BBJ2, Airbus A320
- Dedicated VIP paint schemes and exterior rendering production to customer requirements

Workshops
- Cabinet Shop
- Upholstery Shop
- Sheet Metal Shop
- Electrical Shop
- Finish and Paint Shop
- Carpet Shop
- Ceiling Shop

Quality
- ISO 14001 and OHSAS 18001 Certification

Approvals
- CH.21G.0011, 21J.552 Certification, EN 9100, EN9110
Jet Aviation opened its maintenance and FBO operation at Dubai International Airport in 2005. Our highly skilled and dedicated maintenance technicians perform base and line maintenance as well as light scheduled maintenance for various aircraft types, including Airbus ACJ, Boeing BBJ, Dassault Falcon, Gulfstream, Hawker Beechcraft and Embraer Legacy.

We also provide on demand line maintenance services at Dubai World Central Airport, as well as AOG support at Abu Dhabi Al Bateen Executive Airport, Sharjah International Airport and the wider EMEA region. Jet Aviation Dubai service offerings include scheduled maintenance, defect rectifications, aircraft modifications and AOG support.

We have been providing comprehensive maintenance, repair, refurbishment and avionics support and award-winning FBO services to private and corporate operators at Jet Aviation Geneva since 1969. Our facilities at the Geneva International Airport provide quick and easy access to the city center, which is also near the French border. Based on customer feedback, we refurbished and expanded our FBO in 2013. To enhance customer comfort, improve our service delivery and accommodate growing demand, this was followed by an upgrade of our maintenance facility that was started in 2014 and will continue into 2018.

As a EASA #CH.145.0210 and FAA #CD5Y775M approved repair station, Jet Aviation is an authorized manufacturer warranty service center in base maintenance for the Boeing BBJ and for Gulfstream IV / V / 200 / 300 / 350 / 400 / 450 / 500 / 550 / 650 aircraft.

For owners and operators wishing to maintain, refurbish or upgrade their aircraft, our experienced team of professionals will provide a high level of service to ensure your goals are achieved.
Jet Aviation Moscow/Vnukovo was founded in 2010 and is specialized in line maintenance, defect rectification and AOG services for Bombardier, Embraer, Gulfstream, Falcon and Hawker aircraft operators. Located next to the Vnukovo 3 FBO building, we are a line maintenance, AOG and authorized warranty line service facility for the full line of Gulfstream and Embraer jets. We provide line maintenance, defect rectification and small scheduled maintenance checks up to 750FH for airframe and 1500FH APU. In agreement with the manufacturers, we also maintain inventories of critical spare parts for Gulfstream and Bombardier aircraft to ensure parts availability for the Russian market, particularly during AOG situations.

24/7 AOG services are performed at Moscow-Domodedovo, Moscow-Sheremetyevo and throughout the Russian region. Our cabin interior services include carpet replacement, minor repairs or replacement of aircraft and interior components, as well as leather surface rejuvenation and protective coating application.

Jet Aviation Vienna began operating from its brand new 4,000 square meter hangar facility in 2014. As a Cessna Authorized Service Center, we provide scheduled and unscheduled maintenance as well as off-site AOG services to Cessna Citation aircraft.

We also support AOG and line maintenance for Learjet 40 / 45 / 60, Challenger 604 / 605 / 650, Global 5000 / 6000 and Global Express aircraft, as well as line and base maintenance for Bombardier Challenger 300 / 350, 604 / 605 / 650 aircraft. Additionally we are a Gulfstream Factory Authorized Service center performing line maintenance for the G550 aircraft.

Hawker Pacific Cairns has been supporting Beechcraft, Bombardier, Cessna and Fokker aircraft owners and operators with premium maintenance service for over 40 years.

Our highly skilled and dedicated maintenance technicians perform base and line maintenance for ATR, Beechcraft, Bombardier, Cessna and Fokker. To ensure we meet and exceed your needs wherever you fly, we have dedicated staff to respond to any AOG emergencies with various country maintenance approvals.

As part of the Hawker Pacific’s full service solution we specialize in the repair/overhaul, supply, design engineering, avionics upgrade and first of type installations for both fixed and rotary wing aircraft components and systems.

Jet Aviation Hong Kong has been supporting Bombardier, Gulfstream and Falcon aircraft owners and operators with premium maintenance services since 2001.

Our highly trained maintenance specialists and engineers stem from around the world to ensure your business aviation needs can be met while traveling in the region.

We offer base maintenance and provide AOG support, as well as scheduled and unscheduled line maintenance, airframe and minor engine repairs, avionics modifications, inspections and defect rectifications.

Jet Aviation Hong Kong is a Gulfstream Factory Authorized Warranty Service Center for G450, G500 G550, G650 aircraft and a Dassault Falcon Authorized Warranty Line Service Center for Falcon 900EX and 7X / 8X series. Bombardier BD700 and GL604-605 series aircraft are supported under our regulatory Part 145 approvals.

Global Network & Capabilities Guide
Hawker Pacific Malaysia relocated to its new 2,664 sq m facility in 2015. We offer maintenance, repair and overhaul services, retrofits, modification and upgrade services, aircraft interior recompletions, avionics retrofits and fleet services support. Hawker Pacific Malaysia is the main support base for the Royal Malaysian Police fleet via a through-life support contract, and supports the Royal Malaysian Air Force through King Air B200T material supply, MRO, rework, rectification, component and accessories testing, technical support and publications.

We are also a Dassault Authorized Service Center for AOG and line maintenance for the Falcon 7X, 8X, 2000 series and 900 series of aircraft.

Hawker Pacific started operations in Manila in 2001, and has since become the go-to facility for maintenance for a large range of Beechcraft, Cessna and Bell Helicopters operators based within the region. The facility is also well experienced in assembly of Bell Helicopters and provides support for a wide range of general and business aviation aircraft engines. Hawker Pacific in Manila is also a Rockwell Collins Authorized Service Center.

Hawker Pacific Shanghai has been in operation since 2010 and has been providing line and base maintenance to Beechcraft, Bombardier, Cessna, Dassault, Hawker and Gulfstream aircraft operators.

The facility houses the only battery service and storage center for business aviation in China (Concorde, SAFT, Lucas, Securaplane, DIEHL Aerospace). The facility also plays host to the Asian Business Aviation Conference and Exhibition (ABACE) annually since 2010. In 2018, the facility became a Gulfstream Authorized Warranty Service Center.

Aircraft Management
Jet Aviation Business Jets have been providing turnkey aircraft management services to commercial and private aircraft owners and operators for over 40 years and understand the advantages our clients seek in ownership – as well as the complexities of daily flight operations they would rather avoid. Over 200 clients have benefited from our expertise and global reach. Our aircraft management customers value the simplicity of ownership our services provide as well as appreciate the savings passed on directly to them.

Our global presence represents significant buying power that generates substantial savings in insurance premiums, fueling and other operating costs. If commercial management is chosen, we are able to help you benefit from your ownership by chartering your aircraft when it would otherwise not be flying.

Flight Support Solutions
Should you wish to remain the legal operator of your aircraft, we are pleased to tailor solutions to meet your operational needs as an alternative to classic aircraft management. Through our Flight Support Solutions, you retain full operational control of your aircraft and select from our available modules only the services you require to help you lower your operating costs and increase your efficiency.

Jet Aviation Business Jets can offer the following modules to be tailored to your needs:
- Fuel purchasing through Jet Aviation fuel carnet (lower costs due to buying power)
- Dispatch Services/Flight Planning
- Aircraft and Passenger Insurance (at very competitive premiums)
- CAMO/Maintenance Coordination
- Aircraft acceptance and completions monitoring
- EU ETS
- EU Part NCC Support
- Administration Services (cost control)
- Insurance Comparison Consultancy Services

A/C Management

Jet Aviation is one of the largest aircraft management, flight support and charter companies in the world, with almost 300 aircraft worldwide under our management.

A comprehensive Jet Aviation aircraft management program is an ideal solution for both individuals and organizations. Minimizing risk and the responsibilities of managing day-to-day operations of an aircraft, while capitalizing on various technological platforms, allows Jet Aviation to take a forward-thinking approach to the fundamentals of aircraft management.

Our aircraft management programs are designed to reflect your needs, preferences and budget to maximize the value of your asset and fully harness the operational flexibility of your aircraft.

In addition, Jet Aviation provides completion monitoring services and helps first-time buyers enter the market through its JetStart program. Jet Aviation has the capability to track your aircraft anywhere in the world, 24 hours a day, seven days a week. Our strategically located flight operation centers are home to teams of highly skilled and experienced aviation professionals ready to take care of all your daily aircraft operation needs.

Flight Support Solutions

Jet Aviation has designed flight support programs to act as your extended arm while you retain full control of your aircraft operations. Our flight support solutions provide aircraft owners and Part 91 flight operators around-the-clock support whenever and whenever required. You have the choice of select programs and optional services that provide support best suited to meet your specific needs and budget parameters.

Our Aircraft Scheduling, Maintenance Management, Flight Standards and Fuel Desk programs uniquely address the needs of Part 91 flight departments. Jet Aviation's Completions Monitoring service ensures that your new aircraft is delivered on time and to your specifications. The JetStart program offers a turn-key solution consulting service for new owners of aircraft who need assistance in developing a fully operational in-house flight department before aircraft delivery.

Jet Aviation is one of the largest international providers of private jet charter services. With a modern fleet and support by a global staff available 24 hours a day, seven days a week, Jet Aviation can match the right aircraft to your charter needs.

Whether it be an international flight across Europe, the Middle or Far East, or to North or South America, our Jet Aviation charter team has access to the exact aircraft you need, where and when you need it. So, whatever your destination, short or long-haul, we’ll take care of getting you there, safely, quickly and comfortably.

If you don’t fly very often, or fly to multiple destinations on demand, also called ad hoc, charter is a good solution. You’ll have all the benefits of business jet travel without the need to purchase or maintain an aircraft, enter into a long-term contract, or join a membership program. You have the freedom to pay as you travel, enabling you to maintain maximum financial and scheduling flexibility. You’ll have the freedom to choose the aircraft that best suits your trip. On demand charter is best for those who travel under 100 hours per year. If you fly more than that, talk to one of our charter representatives about other charter program options that may offer you more advantageous pricing.

Jet Aviation is one of the largest international providers of private jet charter services. With a modern fleet and support by a global staff available 24 hours a day, seven days a week, Jet Aviation can match the right aircraft to your charter needs. Private jet travelers have a choice of flexible options:

- **On Demand** provides all of the benefits of business jet charter without the need to enter into a long-term contract, or join a membership program. You have the freedom to pay as you travel, enabling you to maintain maximum financial and scheduling flexibility. On demand charter is best for those who travel under 100 hours per year.

- **Block Charter** agreements offer discounts in exchange for agreeing to purchase a certain number of charter hours, or blocks, to be used over a period of time. A variety of programs can be tailored to meet your needs depending on your flight requirements. Block charter is advantageous for companies and individuals with travel profiles of over 100 flight hours per year.

- **Prepaid** – The Privileged Travel Jet Card offers the ease and speed of guaranteed private business travel. No long-term commitment required; just purchase hours in blocks of 25 as needed. One call is all it takes to book your flight.

Privileged Travel cardholder benefits:

- Guaranteed aircraft availability
- Predictable travel costs
- Occupied hour pricing
- Up to 40% savings on flight costs on qualified round trips (ask your Jet Aviation representative for details)
- No blackout dates
- Personal service – we will work with you to create a trip that matches your needs
- No capital investment, multi-year contract or residual aircraft value risk
- All flight-related fees such as handling, fuel, crew and standard catering included

**Global Network & Capabilities Guide**
Jet Professionals, as part of the Jet Aviation Flight Services Organization, is one of the world’s leading global human capital and staffing services for the business aviation community. Founded in 1983, the company has established a reputation as the respected industry leader in providing the most qualified aviation personnel available worldwide.

Jet Professionals is the only global company offering a full range of aviation staffing services for business jet operators—from the crews who fly them, to the people who maintain them. Because business aviation needs are complex and the regulations of each country are different according to the individual aviation authority, Jet Professionals pays particular attention to the varying requirements for each one to ensure they are met.

**Jet Professionals specializes in:**
- Full-time and temporary placement
- Technical staffing
- Career transition/outplacement
- Payrolling services
- Management & executive staffing
- Flight attendant training offered in partnership with FlightSafety
